7 CUSTOM POSITIONS

Set the mode dial to one of the 7 custom setting positions (C1-C7) which can be assigned to frequently used settings including exposure and focusing options. They can also be set to either the photo or video mode. Adjustments made in the camera's menu will automatically be stored; select DISABLE in the AUTO UPDATE SETTING menu if you prefer not to have changes saved automatically.

SUBJECT DETECTION AUTOFOCUS

The camera is able to detect and track a broader range of subjects, including animals, birds, cars, motorcycles, bicycles, airplanes, and trains – as well as human faces and eyes. Set the camera to AF-C and then go to MENU > AF/MF SETTING > SUBJECT DETECTION SETTING and select the desired subject tracking option. The camera is all set to start tracking the subject selected. Half press the shutter button to start focusing and fully press to take the shot. You can also enable PRE-AF to allow the camera to focus without half-pressing the shutter button.

RESIZING THE AF POINT

Press and hold the joystick to access the FOCUS LEVER SETTING and select you desired mode. To change the AF point size, press inward on the joystick and the focus points will appear. Rotate the rear command dial to change the size of the AF Point / Zone. When the AF MODE is set to "ALL", rotating the rear command dial will also cycle through the various AF modes (SINGLE POINT, ZONE, WIDE)

4K30P WEBCAM

The camera can be used as a high quality webcam for video conferencing or streaming. Go to MENU > NETWORK / USB SETTING > SELECT CONNECTION SETTING and select USB WEBCAM. The camera will be detected as a webcam when connected to a computer as "X-H2S". Set the resolution and frame rate in the MOVIE SETTING MENU > MOVIE MODE. You can also change the white balance in the IQ Menu.

SUB MONITOR CUSTOMIZATION

Go to MENU > SET UP > SCREEN SET-UP > SUB MONITOR SETTING and choose whether you want to change the STILL MODE or the MOVIE MODE options. Select INFORMATION and scroll to the section of the screen you want to change and press OK and select the settings you want to assign to the section.
